

IP150

IP Telephone

The IP telephone IP150 is the absolute specialist for harsh operating environments.

Nothing can harm the IP150 – not splashes of water, or high humidity, or dust, or intense mechanical use. The well-formed housing is made of impact and shock resistant plastic and is even acid, brine or grease resistant.

Demands on end devices are increasing as state-of-the-art VoIP technology is quickly spreading. This modern technology should especially be available for harsh interior areas, e.g. in workshops; in various outdoor areas, or at other special sites. The new IP150 exactly fulfils these requirements and provides all the advantages of VoIP even in difficult environments.

innovaphone PBX

The innovaphone PBX offers solutions in all dimensions when used together with other innovaphone products: From home office scenarios to enterprise scenarios with up to 20,000 end devices.

Pure IP Telephony

Robust hardware

The device can be used both as a wall-mounted device and as a table top device. The device can be converted with just a few manual adjustments. The spiral receiver cable can be configured with an armour-plated cord for extreme environments. The protection category has been tested at IP 65 and the implementation temperature can vary from -20°C to +60°C. Power supply is via power over Ethernet on a sealed cable input.

Accustomed convenience

The IP150 telephone has all the convenience and functionality of a normal phone despite its robustness. A large display shows the telephone status and simplifies the use of various functions. Call forwarding, switching, pickup and other functions can be used in addition to displaying own and remote names and telephone numbers. The displays are available in the 10 most prevalent languages. 21 clearly arranged keys are available for inputting numbers and using the telephone.

Integration in innovaphone PBX

The IP telephone IP150 supports all innovaphone PBX features. Partner and group functions as well as multiple registration are only a few examples of the variety of functions on the innovaphone PBX.

Extreme ringer volume

The ringer volume on the device can be set to up to 95dB (A), thus enabling the ringing to be easily heard also at greater distances or in loud environments.
